

ANGLER WEIGHTED MINI BEAM

DESCRIPTION

The Angler Mini Beam is an ideal solution for illuminating tight underwater spaces. Its compact, directional design eliminates the challenge of fitting both a fixture and lamp into small areas, while featuring enhanced ESD (Electro-Static Discharge) protection compliant with IEC 61000-4-2 standards. For installation, we recommend using Lighting Shrink connections with Mini Beams. The fixture is dimmable with the Brilliance Dimmer and most magnetic transformers. Each unit now comes pre-assembled and packaged with the Shield and weight accessory for added convenience. The Angler Mini Beam is ETL Certified to UL 1838 and CSA C22.2 standards and is available in a Brass (BR) finish.
