

PRECISION MR16

Precision Light. Unmatched Control.

The new Brilliance Precision MR 16 comes in two different wattages 4W and 7W. It also comes in two different Kelvin temperatures 2700K and 3000K. The 4° beam spread is one of the narrowest in the entire lighting industry. Use this lamp anytime you need to pinpoint an object or light up a narrow object. The lamp is fully dimmable and will fit in most major brands of landscape lighting fixtures.

4-DEGREE MR16 FEATURES

- Available in two wattages (4W and 7W) and two Kelvin temps (2700K and 3000K) to dial-in exactly the look you want.
- Features an ultra-narrow 4° beam spread, one of the tightest in the industry, for precise, pinpoint lighting.
- Ideal for highlighting specific objects or illuminating tall, narrow features with clean, focused intensity.
- Fully dimmable and compatible with most major landscape lighting fixtures for easy integration.
